DETAILED ACTION

1. Formal Matters

- A. The Amendment dated 2/20/04 has been entered into the record.
- B. Claim 10 is pending and is the subject of this Office Action.
- C. All Statutes under 35 USC not found in this Office Action can be found, cited in full, in a previous Office Action.

2. Specification

- A. The specification remains objected to since Applicants' reference to US 09/011,375 is incorrect. The correct application number is US 09/011,735. Appropriate correction is required.
- B. The objection to the title has been withdrawn in view of Applicants' amendment.

3. Claim Rejections - 35 USC § 112, first paragraph – scope of enablement

- A. All rejections under 35 USC 112, first paragraph, enablement, have been withdrawn in view of Applicants' amendment to the claims to limit claim 10 to a hMBP with anti-influenza A activity.

4. Claim Rejections - 35 USC § 112, first paragraph – written description

- A. All rejections under 35 USC 112, first paragraph, written description, have been withdrawn in view of Applicants' amendment to the claims to limit claim 10 to a hMBP with anti-influenza A activity.

5. Claim Rejections - 35 USC § 112, first paragraph – new matter

- A. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim recites "isolated". Applicants are required to point out exactly where in the specification the term "isolated" is supported. This also raises the issue as how "purified and isolated" differs from the previous limitation of "purified." **This is a new matter rejection.**

Art Unit: 1647

6. Claim Rejections - 35 USC § 112, second paragraph

A. Claim 10 remains rejected under 35 USC 112, second paragraph, for the reasons already of record on page 4 of the Office Action dated 9/17/03. Applicants argue that Malhotra et al. teach the various domains of MBP claimed in the present invention. The Examiner requests the submission of the Malhorta paper. Furthermore, the phrase "N terminal region carrying cysteine" is also unclear.

B. The rejection of claim 10 under 35 USC 112, second paragraph, has been withdrawn in view of Applicants' amendment to replace the term "calcium dependent lectin" with "hMBP."

7. Claim Rejections - 35 USC § 102

A. The rejections of claim 10 under 35 USC 102 as being anticipated by either Wakamiya et al. or Hartley et al. have been withdrawn in view of Applicants' limitation of claim 10 to "hMBP."

B. Claim 10 is rejected under 35 USC 102(b) as being anticipated by Kawasaki et al. (J. Biochem). The claim recites a purified and isolated hMBP. Kawasaki teach an isolated hMBH (Abstract). The hMBH of both Kawasaki et al. and the present invention are the same regardless of the claimed method steps of the present invention. The present claim is a product-by-process claim. The protein of Kawasaki would inherently possess the characteristics of the claimed invention. (Ex parte Novitski, 26 USPQ 1391). Though not being cited as a reference relied upon in the rejection, Malhotra et al. (reference C12 on the Form 1449 dated 9/17/03) do teach that MBP and conglutinin have been shown to bind to influenza viruses and to inhibit the infectivity and haemagglutinating activity of influenza viruses.

8. Conclusion

A. No claim is allowable.
